Subject: FW: Gold King Post-Incident Monitoring Plan - Draft
R6 addendum Gold King post-incident monitoring 8-27-2015 (3) version.docx

This is an early version of a R6 plan for DW sampling. This was discussed and it was decided not to include in the surface water plan. My suggestion would be for R6 to coordinate with R8 and R9 to take the lead and to fill out the details of the plan and have it be part II of the current plan.

Subject: RE: Gold King Post-Incident Monitoring Plan - Draft

To All,

As indicated in my prior email today. Attached is the Region 6 raft input to EPA's draft Monitoring Plan. This attachment addresses the New Mexico water body (Animas/San Juan) under the Region's jurisdiction. Bert/Sandra please incorporate this into your latest draft plan. Althea, please distribute for EU review in area command.

Thanks,

DFG

Folks, here's the draft plan for internal review. Please send comments or questions to Sandie Spence at: Spence.Sandra@epa.gov by COB Wednesday so we turn it around and get it out to states, tribes and locals.

Dana and Tom, would you please forward to folks in your offices for their review? If it needs to go to ORD would you please also send to the right person there?

Separately, we're working on Q&A's to help answer questions that will inevitably arise – who's sampling, how's it being coordinated, etc.

Bert Garcia

Director, Ecosystems Protection Program

EPA Region 8
